Pentaho Community Dashboards Crash Course - CDE001

The Pentaho Community Dashboards Crash course has been designed to get new users up to speed with the majority of basic features provided by the CDE. By attending this course you will develop core skills that will allow you to create and manage your own Dashboard solutions based on your own data. Learn how to develop end to end Dashboard solutions using Pentaho Community Dashboards that will change the way you do business.

What do we cover in the Training?

1. Overview of the Community Dashboard Editor
2. Managing Dashboards
3. Creating Layouts with HTML & CSS

4. Creating Components – Charts, Tables & Selectors
5. Customising Components Properties
6. Creating Datasources
7. Creating Dashboard Interaction and Functions
8. Top Ten Customers Dashboard Sample

What will you learn?

By the end of this course you will have a good understanding on how to develop your own dashboards against your own data sources. We will be able to create layouts, add chart, filter and various other components, connect to a variety of data sources and finally publish your dashboards for other users to explore. We will finish off the course with the development of a fully functional sample dashboard call Top Ten Customers

What should you know?

This training course has been developed for beginners with little knowledge in programming and scripting. It is however beneficial if users have some knowledge of SQL and Database systems although it is not needed. Its also useful to have a basic knowledge of web technologies like HTML, Javascript, CSS and so on
