Pentaho Community Dashboards Advanced Course - CDE002

The Pentaho Community Dashboards Advanced Course covers everything that's included in the Dashboard Crash Course but goes further to give you the knowledge to create beautiful responsive designs. By attending this course you will develop core and advanced skills that will allow you to create and manage your own Dashboard solutions based on your own data. Get ahead of the curve by taking charge of your development and allow end users to access critical KPI dashboards on all devices with your company branding and custom user interfaces.

What do we cover in the Training?

- Overview of the Community Dashboard Editor
- Managing Dashboards
- Creating Layouts with HTML & CSS
- Creating Components - Charts, Tables & Selectors
- Customising Components Properties
- Creating Datasources
- Advanced Datasources

- Reusable Dashboard Widgets
- Creating Dashboard Templates
- Creating Dashboard Interaction and Functions
- Top Ten Customers Dashboard Sample
- Creating Custom Components
- Responsive Design for Mobile Devices
- Custom User Interfaces
- Custom Branding

What will you learn?

By the end of this course you will have a good understanding on how to develop your own dashboards against you own data sources. We will be able to create layouts, add chart, filter and various other components, connect to a variety of data sources and finally publish your dashboards for other users to explore. We will finish off the course with the development of a fully functional sample dashboard call Top Ten Customers

What should you know?

This training course has been developed for beginners with little knowledge in programming and scripting. It is however beneficial if users have some knowledge of SQL and Database systems although it is not needed. Its also useful to have a basic knowledge of web technologies like HTML, Javascript, CSS and so on

Onsite or Online

Our Dashboard courses can be delivered either onsite or online via our preconfigured cloud machines. Instead log in, dial in and start learning!
